Letter to the Trinity County Planning Commission
Regarding Salt Flat Bridge remaining private.

My husband & I bought the property on Salt Flat Road for the purpose of the privacy. We left Santa Rosa and have owned this home for two years. The house is at the intersection of Salt Flat Road and Chief George Meadow Road so public access would create a lot more noise as well as road dust and would filter into my house.

This quiet property is very important to me since we bought here with this in mind. The Trinity River and the bridge are a part of our pristine environment which I value very much.

Please protect my choice of living in a private community by recommending the Proposed Action which was outlined in the EIR.

Thank you for taking care of my concerns in this situation.

RESPONSE TO COMMENT: 27

Marylynn Rubi

27-a: Thank you for your response. Your comment regarding noise has been noted and was addressed in Section 3.16.3 (Noise, Environmental Consequences and Mitigation Measures). Noise impacts were identified as significant under Alternative 2 for Salt Flat. Specific mitigation measures to Impact 3.16.1 were identified to reduce these impacts to less than significant and include SF-1a, SF1-b, SF-1c and SF1d. No additional response on the noise concern is required.

In addition, your comment regarding dust is addressed in Section 3.12.2 (Air Quality, Environmental Consequences and Mitigation Measures). Air quality impacts were identified as significant under Alternative 2 for Salt Flat. Mitigation measures SF-1a was developed to reduce this impact to less than significant. No additional response on the air quality concern is required.
